Marina

Inn at Harbor Shores Marina

Kebony clear boardwalk was used for the decking of 68 seasonal docks at the Marina at Harbor Shores of St. Joseph, Michigan, USA. The docks range from 35-40 feet in length and the broadside docking will hold transient vessels up to 200 feet in length. Edgewater, the designer and developer of the project, aimed to create a marina that would be beautiful, but also strong enough to withstand the harsh weather of the Great Lakes coast.

“We have designed more than 300 marinas around the world utilizing nearly every type of decking material available, and Kebony stands out as one of the best,” said Greg Weykamp, Principal at Edgewater Resources. “Since installing nearly 12,000 square feet of Kebony decking in 2012 at a public boardwalk and marina south of Chicago, not a single piece of Kebony has needed to be replaced for any reason. When compared to a recent 1,000-slip treated pine marina project that required 5 percent of the boards to be replaced in just six months, Kebony’s durability truly is unbeatable.”

The Wharf DC

Kebony Clear was selected for use in the construction of The Wharf, a new commercial and residential development in Washington, D.C. along the Potomac River. Opening in October 2017, Kebony was used for more than 100,000 square feet of decking, as well as cladding on certain store fronts and rooftop decks.

The D.C.-based developer duo of PN Hoffman and Madison Marquette teamed up to form Hoffman–Madison Waterfront to create an eclectic mix of uses and public spaces connecting people to the waterfront. Clark Construction Group is constructing the public spaces at The Wharf.

“The Wharf team carefully selected beautiful and durable materials that enhance the built environment,” said Monty Hoffman, founder and CEO of PN Hoffman. “This unique development is transforming D.C.’s Southwest Waterfront.”

Port of Rochester Marina

The Port of Rochester Marina is a brand new state-of-the-art public marina offering the best in convenience, customer care and value. Located on Lake Ontario where the Genesee River meets the lake, about 7 miles north of Rochester, New York; the marina offers boaters the latest and greatest of boating amenities and access to a vast array of recreational activities.

Engineered by Edgewater Resources, one of the most respected names in waterfront development, the intricate expanse of floating docks provides boaters with a safe and reliable place to port. Constructed of Kebony wood, these docks not only provide the marina with the security of outstanding durability but also create a peaceful environment that highlights the beauty of its natural surroundings.

2x6 Boardwalk Decking

Kebony Clear is perfect for high traffic areas like boardwalks and docks. With larger available dimensions and enhanced stability, choosing Kebony will ensure your project will withstand heavy use for decades; maintaining strength and beauty as it patinas to a silver-gray over time. Kebony's boardwalk product is the go-to for award-winning outdoor spaces across the country, including The Wharf in Washington D.C., and New York City's Hunter's Point South and Pier 26.

2x6 Square S4S E2E (#2522)

Actual Dimensions: 1 1/2" x 5 1/2"

Lengths: 10', 12', 14', 16'

Appearance

All Kebony woods have a deep brown color that will turn to a silver-gray patina over time. The speed of this graying process depends on the intensity of exposure to environmental elements like the sun and rain combined with the type of application.

Kebony Clear RAP products are produced from FSC®-certified Pinus Radiata with clear surfaces and are uniformly treated throughout the board. They can be further machined as any other hardwood.
