SYSTEM

MOUNT SECURELY TO A VARIETY OF SUBSTRATES:*

- 1/2" drywall
- 1/2" drywall with tile
- 1/2" drywall with marble
- 1/8" fiberglass tub surround
- 5/8" drywall
- 5/8" drywall with tile
- 5/8" drywall with marble
- 1/4" fiberglass tub surround

*Including multiple layers up to 1 1/2" thick

300-pound weight capacity when securely installed per instructions. Limited Lifetime Warranty. Independently tested by CSA and NAHB laboratories to exceed ADA, ASTM, ANSI and CSA standards.

DID YOU KNOW that 16" grab bars can typically mount directly into studs because the standard stud size is 16" on center? 18", 24", 36" and 42" grab bars will often need an anchoring system when mounted into drywall, as an alternative to stud or wood-block installation.

EASY, SECURE INSTALL... ANYWHERE ON THE WALL™

1. SECUREMOUNT GRAB BARS

The unique flange makes it easy to connect to the stud at multiple points, at any angle!

2. SECUREMOUNT ANCHORS

Precision-engineered for optimal bracing behind the wall, SecureMount Anchors allow for easy grab bar installation — with no studs required — anywhere on the wall.

3. SECUREMOUNT SYSTEM

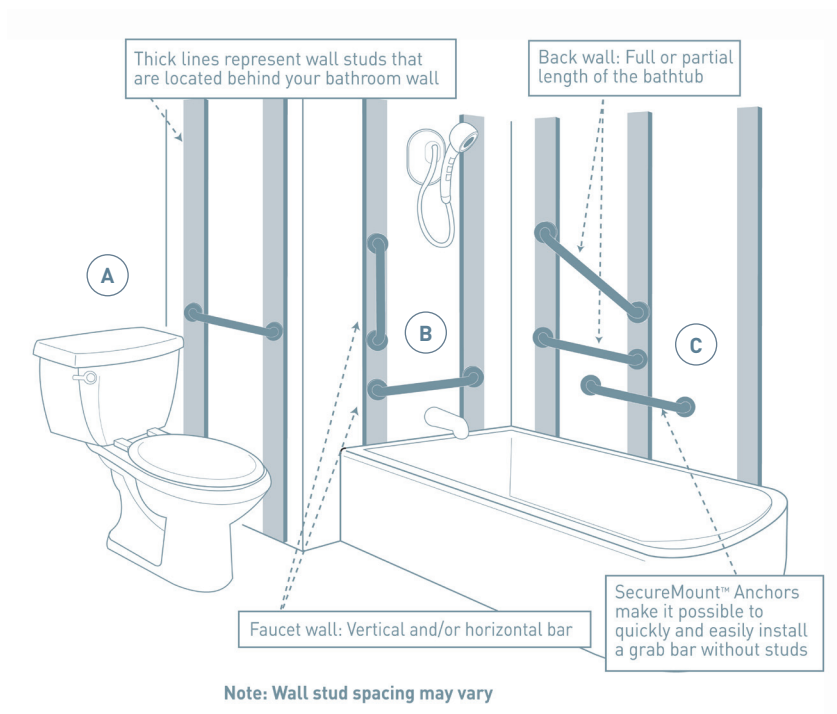

The SecureMount System is the ultimate in easy, secure grab bar installation. Plus, it provides stylish designs and choices in finishes and features.

Grab Bar Guide

HOW MANY GRAB BARS DO I NEED AND WHERE SHOULD THEY BE INSTALLED?

Health professionals typically recommend three grab bars in a bathroom:

- A** At least one near the toilet.
- B** At least one along the showerhead wall or whichever end of the tub/shower you use to enter/exit.
- C** At least one along the back wall in the bathtub or shower.

WHO SHOULD USE GRAB BARS?

Everyone! People of all ages and abilities can benefit from using grab bars.

WHAT CAN A GRAB BAR DO?

- Reduce risk of falling in the tub or shower.
- Help steady yourself while getting into and out of the bathtub or shower.
- Assist in safely lowering and raising from a seated position.

THINGS TO CONSIDER WHEN SELECTING A GRAB BAR(S):

- **Length:** Select a grab bar that is the suitable length for your bath or shower area.
- **Weight Capacity:** Choose a grab bar that at least meets ADA requirements (250 lbs.); SecureMount™ Grab Bars have a 500-pound weight-pull capacity that exceeds ADA requirements (when securely installed per instructions).
- **Installation:** Grab bars that feature SecureMount have a design that allows for secure installation into a stud or wood backing at any angle. When using SecureMount Anchors, there is no need for installation into a stud or wood backing.
- **Grip Surface:** Consider a grab bar with a textured surface or grip feature that provides a better hold in a wet bathroom environment.
- **Finish:** Consider a grab bar that matches your faucet and other fixtures.
